

# Ketosource<sup>®</sup> Pure Acacia<sup>™</sup>

## Certificate of Analysis

**Manufacturing Date:** 11/2024

**Best Before Date:** 08/2027

**Batch No.:** A1013

### Quality Testing

| Quality Parameter                                                                                               | Internal Specification | Test Result                | Lab Test Method                                                                                                                      |
|-----------------------------------------------------------------------------------------------------------------|------------------------|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| Heavy Metals<br>- <b>Mercury</b><br>- <b>Arsenic (As)</b><br>- <b>Cadmium</b><br>- <b>Lead</b>                  | ≤ 0.2 mg/kg            | Conforms to internal specs | Digestion via microwave assistance with analysis by inductively coupled plasma mass spectrometry (ICP-MS)                            |
| Micro<br>- <b>Aerobic plate count</b>                                                                           | ≤ 1000 cfu/g           | Conforms to internal specs | ISO 4833-1                                                                                                                           |
| Micro<br>- <b>Yeast</b><br>- <b>Mould</b>                                                                       | ≤ 100 cfu/g            | Conforms to internal specs | NCh 2734                                                                                                                             |
| Micro<br>- <b>Coagulase positive staphylococcus</b><br>- <b>Escherichia coli</b><br>- <b>Enterobacteriaceae</b> | ≤ 100 cfu/g            | Conforms to internal specs | Based on ISO 6888-1 (coagulase positive staphylococcus)<br><br>ISO 16649-2 (E. coli)<br><br>BS ISO 21528-2:2004 (enterobacteriaceae) |
